

Sprint Retrospective		Iteration	Sprint 4			
Project	GoGreen					
Group	86					
User Story	Task	Task Assigned to	Estimated Effort (in hours per person)	Actual Effort	Done	Notes
Implementing "Eat vegetarian".	Creating a table with a list of foods with their own scores on the database.	Nafie	2	2	Yes	The scores put on the table are not final. Maybe we will change them.
	Building the GUI interface for this feature.	Silvu / Axian	7	7	Yes	--
	Designing the screen for this feature.	Stef	6	6	Yes	--
	Making the connection between the server and the client side for this feature	Gijs	8	8	Yes	--
	Building the entity spring boot classes	Waqas / Nafie	6	8	No	We created all the classes we need but we still have to add some specifications, the classes for the vegetarian meal feature are final
Main Problems Encountered						
Problem 1	Delay in implementing the database classes					
Description	We couldn't implement all the classes in time because we focused a lot on the vegetarian feature.					
Reaction	For next week, we will have all the classes implemented and connected to the database.					
Problem 2	Some minor issues with our already built database					
Description	We used some datatypes that weren't the best solution for our app					
Reactions	we switched the auto-incremented values to be serial.					

Adjustments for next Sprint Plan							
Focus more on our design and gui.							
Do more tests for everything and try to have other features done for the next week or two.
